

## ARREST OF CAPT. JONAS P. LEVY.

The following letter is published in the New York papers as constituting the ground of the indictment of Capt. Levy by the Grand Jury of this District at the instance of the United States:

WASHINGTON, NOVEMBER 7, 1851.  
SIR: I have addressed to you several letters since my arrival in the United States from your city, but sorry to say have not had the pleasure of a reply to any of them. The main object of this letter is to warn you of the pending danger of your Government and loss of your territory.

The principal object of my visit to this capital is to defend the nefarious plans of Jose de Garay and his companions in the Tehuantepec matter. They are now in this city with the Hon. Daniel Webster, concocting plans to make a political question of Tehuantepec for the Whigs, which our party, the Democrats, will not allow. It is Mr. Webster's object to get you to rescind the article in the treaty for the protection of the line of your frontier; take my advice as you value the interests of your country, never do it. It is worth more than all the gold mines of California to you.

I have published many articles in this country in support of the character of your Government and nation. The enclosed article has been of much service to you, and will have its due influence in their coming Congress.

It was Mr. Webster's intention to press the Tehuantepec matter this next Congress, but will now be careful how he acts before the Hon. Mr. Lechelle about the frontier line. I hope you receive this that your Excellency has signed my grant that was left in the honorable Secretary's hands to be made out according to the laws passed by Congress for your approval and signature, as I am anxiously awaiting for it to put my route in operation, and save your country from ruin and loss. My steamers are all ready for operation, and I have sufficient funds in Mexico to complete my route in a short time, so soon as I get your signature to the acts of Congress to carry out my grant to become a law.

I sincerely hope your Excellency will see the urgent necessity to dispense this important object, which the interest and welfare of Mexico depends on. My line of communication will support your administration more than all the armies that can be put in the field against the revolutionists, and enable you to crown yourself with laurels.

I send this under cover and through the hands of your honorable Minister residing in this city, and sincerely hope it may reach your Excellency's hands in time to be of service to you. Trusting to have an early reply from your Excellency in the city of New York, where I leave for in a few days.

Wishing your Excellency health, long life, and prosperity, I have the honor to sign myself your sincere friend and obedient servant,

JONAS P. LEVY.

To his Excellency Sr. Don MARIANO ARISTA,  
President of the U. States of the Republic of Mexico.

## FROM AN AMERICAN LADY.

LONDON, JANUARY 20, 1852.  
I shall be glad to hear from you. Meanwhile you may be charitably amused with an invalid's notes, *currente calamo*, of the beautiful ideas which float past her delusion. How could I enlarge on the *catalogue Raisonné* of the Great Exhibition? Nay, I forbear! But I have just read an account of the surprising success of an Englishman, if Englishman he be—not a Yankee—who has built name and fame upon making *Paper Maché* in large masses: not of paper, like the French, but of its French rag. This wonderful fact conceals which I have heard of from a child's prattle, has at least been carried into execution with good sense, skill, and enterprise by Mr. Bidefeld, at Stains, on the river Colne.

If made of rags, the material of paper, why not of the coarsest or refuse cotton, the material of rags? of flax, of milk weed, &c.

And yet another: A machine has been invented to bore cylindrical holes, *doying* downwards to meet the roots of any trees which may need their aid. They are to be filled with manure. Would it not be wise to have similar holes or passages, leading from a sufficient distance to the tree, and filled with loose stones—a channel peculiarly adapted to the conveyance of natural or artificial moisture? When a young tree is transplanted such might easily be made and filled by means of guiding boards, afterwards withdrawn.

Does M. CALDERON know how many a "God speed" has gone up for the QUEEN of Spain, whose gentleness to a Mother has read the nations a lesson so beautiful? I heard a gentleman say, "It overcomes us, softening such good of harsh that repels us in the doings of man, and it is worthy of the exquisite line—"

"So shines a good deed in a naughty world!"

## THE AMERICAN INDUSTRIAL EXHIBITION.

FROM THE NEW YORK POST OF FEBRUARY 2.

We announced a few days since that the Common Council of this city had given Mr. RIDDLE and his associates a lease of Reservoir Square, for very favorable terms, for a period of five years, for the purpose of erecting on it a suitable structure in which to make an exhibition of the industry of all nations. A meeting was held yesterday by a few gentlemen interested, or desirous of becoming interested, in the enterprise, preliminary to an application for a charter of incorporation.

We understand that among the foreign attractions which are already promised to it are the *Amazon*, by Kiss, which took a Grand Council Medal at the late London exhibition; a colossal statue of Washington, by Marchetti, whose statue of Richard Cour de Leon also took a Council Medal; a statue of Wesley, by Carew, and also one of the Crucifixion, exhibited by him in the Crystal Palace; the statue of Prometheus, by Manning; the "Veiled figure," by Monti; a silver statue of Columbus, from the Sardinian Commissioners; and some three hundred and fifty works of art exhibited in London last summer, scarcely less interesting or remarkable than those we have enumerated.

Paris, the great *Rau de Cologne* manufacturer, has engaged to keep a fountain of Cologne water playing during the entire period of the exhibition, provided the amount consumed is admitted by our Government free of duty, which we presume should be done as a matter of course. He has also engaged to exhibit about one hundred and fifty of the very best paintings in Düsseldorf on the same terms.

Prince Albert, the Duke of Devonshire, and Sir Joseph Paxton have also promised to become exhibitors.

A proper building can be erected and the goods all stored ready for exhibition, it is supposed, for less than \$200,000; a sum, at fifty cents a ticket, which would be reimbursed to the exhibitors if only half of the citizens of New York, Brooklyn, Williamsburg, and Jersey City were to visit it once.

Such an exhibition would give New Yorkers a busy and profitable summer. Hotelkeepers, steamboat, and locomotive proprietors, omnibus owners, &c. would have reason to remember such an event forever.

**MARRIAGE OF JENNY LIND.**—A Telegraphic despatch from Boston, dated on Thursday, says: "JENNY LIND was this morning married to Otto Goldschmidt, pianist, of Hamburg, at the residence of S. W. Ward, Esq., her banker in this city. She was married after the Episcopal service by the Rev. Dr. Wainwright, in the presence of Ex-Governor Everett; N. J. Donchitz, her legal adviser; Mr. and Mrs. S. W. Ward; and the Swedish Consul. Mr. Goldschmidt had performed with her at several of her recent concerts. They will reside for the present at Northampton, Massachusetts."

The New York Tribune of Wednesday says: "It is idle, worse than idle, to visit this city with the idea of engaging a passage by steam across the Isthmus to California. All the vessels (both Panama and Nicaragua) are full up to April, and those for that month are rapidly filling up. Either engage your passage weeks beforehand, or take your way around the Horn or over the Sierra. There is no help for it."

**STEAMBOATS AND RAILROADS.**—From a report lately made to the U. S. Senate it appears that 96,100 passengers were carried during the past year on the steamboats which navigate the Hudson river. In the last half of the year 517,418 passengers were carried on the Hudson River Railroad, while in an unfinished state, and not opened until October. The result is equal to an average of 3,276 passengers per day, or more than a million per annum. It thus exceeds the number said to be carried on all the steamboats; a result which ensures the success of the railroad. The travel through the valley of the Hudson must continue to increase, and during the present year will probably be more than a million of passengers in the aggregate. *Journal of Commerce.*

## WASHINGTON NATIONAL MONUMENT.

The following correspondence, relating to a block of marble which his Holiness the Pope proposes to furnish for the National Monument, was ordered to be published by the Board of Managers:

LEONARD DES ETATS VIVANTS A L'AMERIQUE, RUE LE SAINT SIRO, ROUE, LE 24th DECEMBER, 1851.  
SIR: I have the honor to inform you that I have been apprised by his Holiness the Pope, through Cardinal Antonelli, the Secretary of State of the Roman Government, of his intention to contribute a block of marble towards the erection of the National Monument to the memory of Washington. The block was taken from the ruins of the ancient Temple of Peace, adjoining the Palace of the Caesars, and is to receive the inscription of "Home to America." As soon as this work is completed, the necessary measures will be taken to forward it to you.

I am, sir, very respectfully, your obedient servant,  
LEWIS CASS, JR.,  
Addressed to the SECRETARY of the National Monument Society, Washington.

WASHINGTON, FEBRUARY 4, 1852.

SIR: Your letter of the 24th of December last, informing me that you have been "apprised by his Holiness the Pope, through Cardinal Antonelli, the Secretary of State of the Roman Government, of his intention to contribute a block of marble towards the erection of the National Monument to the memory of Washington," has been laid before the Board of Managers of the Washington National Monument Society of this city, and they have instructed me to communicate through you to his Holiness the Pope their sincere gratification at the information thus furnished of his intention to contribute a block of marble from the ruins of the Temple of Peace at Rome to be placed in the monument now in the course of erection in honor of the illustrious Washington. I am requested to assure you that it will be not only interesting, but acceptable, as an offering from "ROME TO AMERICA," and especially so as forming a part of an ancient structure, once dedicated to peace, in the vicinity of the Palace of the Caesars, to be placed in juxtaposition with blocks of stone which have been presented by the modern and free States of the American Confederacy. It will be regarded as a manifestation of respect paid to patriotism and private virtue—to the name and character of one whom the civilized world holds in the highest estimation, and to a nation whose annals he has rendered glorious.

The monument now in the course of erection will, it is believed, from its magnificence, do honor to the great patriot and statesman, as well as to his countrymen by whose voluntary contributions it is to be erected.

The Board of Managers respectfully request you to tender their thanks to his Holiness for his very acceptable contribution, and to inform him that it shall be placed in a conspicuous position in the monument.

I have the honor to be, very respectfully, your obedient servant,  
GEO. WATTERSON, Secretary.  
LEWIS CASS, JR., U. S. Chargé d'Affaires, Rome.

## LEGISLATURE OF MINNESOTA.

CORRESPONDENCE OF THE DULUTH COMMERCIAL ADVERTISER.

ST. PAUL, (MINNESOTA), JANUARY 15, 1852.  
The Territorial Legislature convened one week ago yesterday. The delegation from Pembina, in the Northwest, came a distance of five hundred miles with dogs and sledges, camping out during fourteen nights on the way, with the mercury, some of the time, below 0! The Governor's message is full of interest, and a perusal of it will repay any one desirous of obtaining light upon the resources, condition, and prospects of Minnesota.

The value of the taxable property of the Territory, returned by the assessors, is between \$1,200,000 and \$1,300,000, and has increased fifty per cent. within the last year. About eighty thousand acres of land have been entered, in one form or another, at the land office during the same time. Taxes have been trifling; the public treasury is solvent, and his Excellency recommends that by prudent legislation it be kept so. Ample provision has been made by Congress for the support of common schools and the endowment of a university, by the grant of the sixteenth and thirty-sixth sections in every township to the former, and of two entire townships, to be selected from the unlocated lands of the whole Territory, to the latter; and the Governor recommends that these sources be religiously protected and carefully husbanded.

His Excellency alludes to the Indian treaties concluded last summer with the Sioux, at Traverse des Sioux and Mendota, and with the Chippewas at Pembina. By the former a tract of forty-five thousand square miles is to be ceded, and by the latter a tract one hundred and fifty miles in length by sixty-five in breadth. He draws a most glowing picture of the advantages, resources, and fertility of the larger tract—through the midst of which flows the St. Peter's, and whose borders are watered by many other rivers—and characterizes it as the "garden-spot" of the Northwest.

The treaty of Pembina provides for the cession of a region bounded on the north by the British line, and intersected by the Red river of the North. Its confirmation, he thinks, would invite into this region American settlers, and be the impetuous step towards opening a commerce with the vast country, from which an extensive commerce will ultimately be drawn to the Atlantic cities.

The boundary line is now in dispute between the half breeds on this side and the settlers on the British side, and he recommends that measures be taken to have it defined and marked.

The number of Indians within the Territory he states at twenty-five thousand. But a single murder has been committed by them on the whites within its limits during the last year.

## BIRNEY ON COLONIZATION.

The Pamphlet on COLONIZATION, from the pen of Mr. JAMES B. BIRNEY, the Abolitionist, comprises an examination into the case of Strader et al. v. Graham, recently decided in the United States Supreme Court, and concludes with an address to the free colored people of the United States, advising them to emigrate to Liberia. The point of special interest in the pamphlet is the advice to the free colored people to emigrate to Liberia. He points out forcibly the necessity for their going somewhere before long, owing to the stringent enactments of the various free States excluding them from their territories. He contends that the state of things which rendered their presence here an encouragement to their enslaved brethren has passed away; that their presence can be of no service; that by remaining they will only destroy themselves; that "superiority on the part of the whites will always be wanted over them," and that, "as a class, inferiority will always be acknowledged" by the blacks. Having shown the necessity of their going somewhere, he then considers the various countries opened to them—Canada, the British West Indies, and Liberia. He gives various strong objections to the two first, and concludes by warmly recommending them to go to Liberia.

The Ohio State House, which was burnt on Sunday, was an old building. A new and magnificent Capitol is in progress of erection. It is 304 by 184 feet, and covers 55,638 square feet. Last year \$99,388 were expended on it, and this year an additional appropriation of \$250,000 to \$300,000 is asked for. The Columbus Journal gives the following account of the destruction of the old building:

On Sunday morning, about 4 o'clock, the cry of "fire" rang through our streets. It was soon ascertained that the Old State House was on fire. The first fire alarm was given by the bell of the Senate Chamber, and on the floor. This was nearly extinguished, when it was discovered that the timbers overhead and near the belfry were on fire. Soon it burst out through the roof, and the entire belfry was quickly in flames. The engines could not reach the fire, and it was then evident that the venerable old edifice by the Lake and the Senate Chamber, and on the floor. This was nearly extinguished, when it was discovered that the timbers overhead and near the belfry were on fire. Soon it burst out through the roof, and the entire belfry was quickly in flames. The engines could not reach the fire, and it was then evident that the venerable old edifice by the Lake and the Senate Chamber, and on the floor. This was nearly extinguished, when it was discovered that the timbers overhead and near the belfry were on fire. Soon it burst out through the roof, and the entire belfry was quickly in flames. The engines could not reach the fire, and it was then evident that the venerable old edifice by the Lake and the Senate Chamber, and on the floor. This was nearly extinguished, when it was discovered that the timbers overhead and near the belfry were on fire. Soon it burst out through the roof, and the entire belfry was quickly in flames. The engines could not reach the fire, and it was then evident that the venerable old edifice by the Lake and the Senate Chamber, and on the floor. This was nearly extinguished, when it was discovered that the timbers overhead and near the belfry were on fire. Soon it burst out through the roof, and the entire belfry was quickly in flames. The engines could not reach the fire, and it was then evident that the venerable old edifice by the Lake and the Senate Chamber, and on the floor. This was nearly extinguished, when it was discovered that the timbers overhead and near the belfry were on fire. Soon it burst out through the roof, and the entire belfry was quickly in flames. The engines could not reach the fire, and it was then evident that the venerable old edifice by the Lake and the Senate Chamber, and on the floor. This was nearly extinguished, when it was discovered that the timbers overhead and near the belfry were on fire. Soon it burst out through the roof, and the entire belfry was quickly in flames.
